ABSTRACT:

A contents retrieval system has: retrieval request receiving means for receiving a retrieval request of contents on a communication network from a user accessing through the communication network, and setting up processing conditions for retrieval processing in accordance with the retrieval request, and further issuing a reservation number of the retrieval processing and informing the user of the reservation number, and in addition applying the reservation number to the processing conditions and registering the same with a predetermined retrieval management table; contents retrieval means for retrieving the contents on the communication network in accordance with the processing conditions registered with said retrieval management table and storing the retrieval result, together with the reservation number, in a predetermined retrieval result storage file; and retrieval result providing means for retrieving a retrieval result associated with the reservation number from among the retrieval results stored in said retrieval result storage file, when an inquiry concerning the retrieval result is made from a user

based on the reservation number, and providing the retrieval result for the user.
